Registration

8/26 Would not take my previous registration

I made an identical registration

Profile gone from previous registration (of course, as it is a different registration)

Signed out and in, so I could sign in immediately with the registration I just made

8/29 Would not take my 8/26 registration

Profile in the kebob dropdown list

The Profile can be accessed only from the Chat tab (not from the other tabs)

This is not true in Cybersecurity Panel where it can be accessed no matter what tab you are on

Profile

On thought, the required question is ok

These are good questions

It's just that I personally find them hard to answer, but I think that's just me

User Guide

Mentions undefined / unknown things:

knowledge/

Food Canvas

I'm guessing that Food Canvas is a projected dashboard tab that could theoretically replace Insights/Workspace/Documents. See my content ideas in the Dashboard PDF

Personas

Kitchen Coach / Veggie Chef / Fruit Maven alone would be uncontroversial and probably helpful
Superfood Superman / Enzyme Expert perform poorly. Not bad enough to remove but not good enough to recommend. Options are to remove them or to leave them.

Book Advisor is ok. - except maybe the hallucinations are excessive

An overall issue is that AI considers my viewpoint to be "claims" and I consider the AI's viewpoint to be "claims." This harms Superfood Superman / Enzyme Expert more than it does than the basic functionality of Kitchen Coach / Veggie Chef / Fruit Maven / Book Advisor. It changes the latter somewhat but does not harm the basic concept of "eat your vegetables."

Dashboard ideas - see the other PDF. I don't know how to carry them out of course.

Documents tab

I was unable to export a document.

Workspace tab

I am overwhelmed by the widgets.

Insights tab - comments

The insights are identical for different guests and for logged-in person before any chatting

I took screenshots for 2 different guests so that I could compare them.

The insights have identical source quotes

I have not seen any chat that changed the insights

Example source quotes:

"Ship the produce habit before opening recipe tabs" - Veggie Chef

"Protect two short prep blocks on busy weekdays" - Kitchen Coach

What was the source of the source quotes?

I chose those as examples because I feel very sure I did not see them in any chat that I had done

Made from RAG?

Persona testing? - "protect" is not in Kitchen Coach persona testing saved document

Talking to each other?

Chats by other users?

Dropdown of Open / in progress / completed / abandoned worked ok

I did not understand confidence drop-down list

Add to Kanban gives message "Sent to Kanban (To Do)" but I don't have one?

My next steps

I will revise the Prompt cards.

I will supply resources for the Food Resources widget (Workspace).

To decide with input whether Superfoods Superman, Enzyme Expert, and/or Book Advisor should be removed or retained.
